"The Water Diplomat" is a free monthly news and intelligence resource produced by OOSKANews and Geneva Water Hub. The publication, distributed monthly by email, is part of a media platform developed to engage our world in understanding the intersects among water, peace, conflict and diplomacy. The monthly publication is accompanied by a free monthly videocast distributed by Vimeo.

The Water Diplomat is produced by OOSKANews as part of a collaboration with Geneva Water Hub.

OOSKANews is the world's leading publisher of current international water, and water-related news and intelligence.

Geneva Water Hub is a centre of excellence on hydroplitics and hydrodiplomacy whose mandate is to build bridges to prevent and resolve water-related conflicts, promoting the use of water as an instrument of peace.

"The Water Diplomat" media platform builds upon the work of the Global High-Level Panel on Water and Peace that produced in 2017 the milestone report "A Matter of Survival". The media provides news and intelligence pertaining to various themes of the Panel's report, contributing to global awareness on hydroplitical challenges worldwide.

This initiative is part of the Blue Peace Movement.
