

# Summer school in **Water** **Governance**

frameworks and negotiations

3 - 15 June 2019

## **Module**

### ➔ **Hydrology: Global trends and environmental changes**

The module provides the scientific basis on catchment hydrology and on impacts of changing climatic conditions on water resources, both with indoor and outdoor teaching.

## **Speaker**

➔ Markus Stoffel: Associate Professor, Institute of Environmental Sciences, University of Geneva and specialized in Climate Change Impacts and Risks in the Anthropocene.
