

# Summer school in **Water** Governance

frameworks and negotiations  
4 - 16 June 2018

## Module

- ➔ **Hydrology: Global trends and environmental changes**  
The module provides the scientific basis on catchment hydrology and on impacts of changing climatic conditions on water resources, both with indoor and outdoor teaching.

## Speaker

- ➔ **Markus Stoffel:** Associate Professor, Institute of Environmental Sciences, University of Geneva and specialized in Climate Change Impacts and Risks in the Anthropocene.
